## HOME FARMING

## About TALLBOY® System

With veggyBARREL®, you can now grow lots of healthy veggies, herbs, and fruits at home, thanks to its unique, efficient design and ease of use. The veggyBARREL® is a game-changing home farming system for anyone who wishes to grow some of their own food. Our veggyBARREL® has been thoroughly tested by members of our community and several master gardeners.

veggyBARREL® is a one-of-a-kind soil-based garden that incorporates vermicomposting and permaculture to mimic the natural forest ecology.

01  
OPTION

### GERMINATING

Many seeds do not germinate for a variety of reasons. It is always preferable to plant the germinated sapling rather than directly sowing the seeds in to veggyBARREL®.

02  
OPTION

### PLANTING

Tomato, Brinjal... are examples of long-rooted plants that can be planted on top. Plant leafy and beat types like radish, turnips, carrots, spinach, and lettuce on the sides. Plant vines on the bottom.

03  
OPTION

### HARVESTING

Whether replanting or regrowing the veggyBARREL® will require some planning to keep you fed all year.

With just 5 litres of water, veggyBARREL® can grow 100 plants each pot in a chair space.

Perfect for seniors and those with physical handicap, comes with heavy duty castor wheels.

Harvest only what needs to be cooked, eat fresh & delicious. Guilt free food full of nutrition.
